Interpretation

Promotion readiness is a longitudinal signal: it measures sustained movement across dimensions between measured snapshots, not a single score. Positive net delta with broad growth areas indicates upward trajectory.

Recommendations

No specific recommendations have been derived from the current measured inputs. Recommendations will appear once additional assessment evidence is captured.

Confidence Level

Confidence: Moderate — based on measured snapshots; rises as more are captured.

Data Source

progression-engine.buildProgression !' ei_profile_snapshots over time (net delta between measured snapshots).
