

Career Anxiety

Curiosity Assessment · lakshman

Concern	Career Anxiety
Stage	Curiosity
Age	43 years
Date	17 May 2026

About this report

This is the Curiosity Stage report for lakshman — the first stage of MetryxOne's CAPADEX behavioural intelligence assessment. It measures self-awareness and pattern recognition across 10 domains related to "Career Anxiety", benchmarked against 10,000+ assessments using MetryxOne's validated Self-Diagnostic Intelligence (SDI™) framework.

For personal awareness and development purposes only. Not a clinical diagnosis or medical opinion. Seek professional guidance before making significant decisions based on these results.

Assessment finding

lakshman's results reveal the real shape of the "Career Anxiety" challenge.

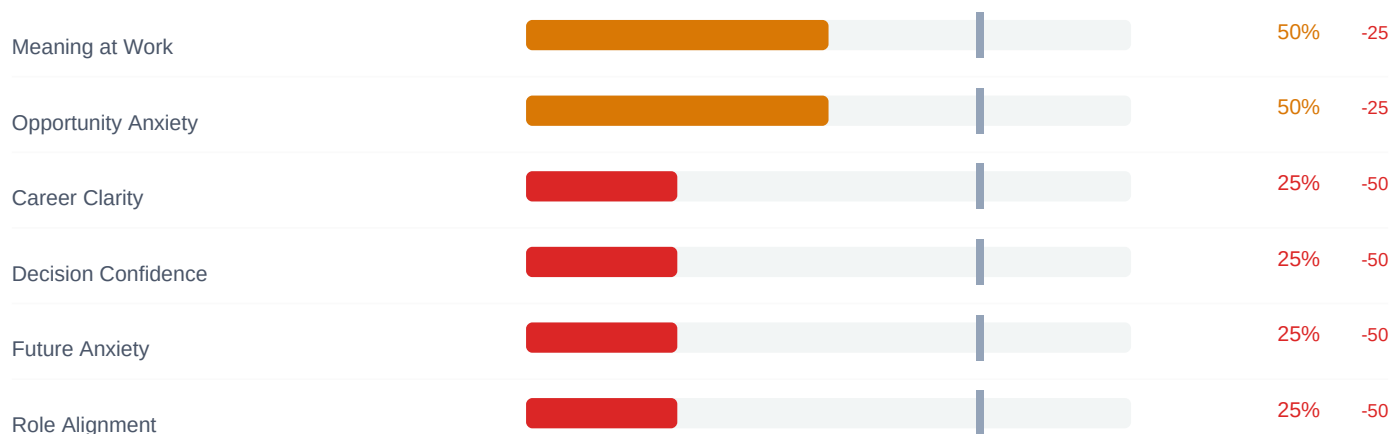

These Curiosity results are an honest picture of where things stand. The clarity may be uncomfortable — but it is exactly the kind of signal that, when understood properly, creates real forward movement. The Insight stage finds what is actually driving this pattern.

A score of 59 reflects an emerging pattern — enough awareness to identify the concern, with clear room for structured development. This is exactly where the Insight assessment creates the biggest impact.

- What this looks like in your daily life
- You have good days and harder days — the pattern is not constant, but it is not resolved either.
 - You can manage it when you really focus, but it costs more effort than it should.
 - You are aware of the issue. That awareness is your biggest asset right now.

Cognitive profile

Competency		Score	vs 75
Purpose Clarity		75%	+0
Social Comparison		75%	+0
Decision Making		50%	-25
Direction Persistence		50%	-25

What each domain score means

Purpose Clarity · Strength · 75%

Has a clear, stable sense of professional purpose — decisions and priorities align naturally.

Social Comparison · Strength · 75%

Uses awareness of peers' progress as useful calibration without letting it undermine self-assessment.

Decision Making · Developing · 50%

Decision Making is developing — targeted focus here will accelerate meaningful progress.

Direction Persistence · Developing · 50%

Commitment to direction fluctuates under pressure — may abandon paths before giving them enough time.

Meaning at Work · Developing · 50%

Current work feels disconnected from what matters — energy leakage is likely.

Opportunity Anxiety · Developing · 50%

Opportunity decisions generate disproportionate anxiety — fear of wrong choice may cause inaction.

Career Clarity · Needs Focus · 25%

Career direction feels uncertain or fragmented; the path forward is not clearly defined yet.

Decision Confidence · Needs Focus · 25%

Decision Confidence shows the most room for growth in this profile — and is highly responsive to focused effort.

Future Anxiety · Needs Focus · 25%

Uncertainty about what comes next is generating more friction than forward movement.

Role Alignment · Needs Focus · 25%

Role Alignment shows the most room for growth in this profile — and is highly responsive to focused effort.

Behavioural pattern detected

Clear Strengths, Clear Gaps

There is a 50-point spread between the strongest area (Purpose Clarity: 75%) and the lowest (Role Alignment: 25%). The gap is a specific skill that responds well to targeted development.

Key findings

Standout strength

Purpose Clarity

Score: 75% — This is a genuine strength, scoring in the Proficient band. It provides a real foundation to build from in the next stage.

Focus area

Role Alignment

Score: 25% — This area has the highest growth potential in this profile. With targeted support, this is where the most immediate and measurable change can be created.

Your action plan

Based on your assessment, here are personalised next steps to support your growth:

1

Learning Behaviour Intensive — Foundations Reset

Improve LBI by 15-20 points over 4 weeks with structured intervention

immediate · high intensity

2

Resilience Foundation Building Programme

Move from Forming/Emerging to Developing stage within 4-6 weeks

1-2 weeks · moderate intensity

3

Employability Readiness Development Track

Raise employability readiness above 60% within 6-8 weeks

2-4 weeks · moderate intensity

Talk to a Counsellor

Your assessment signals indicate that a conversation with a qualified counsellor would be beneficial. This is a supportive step — not a diagnosis.

Your score maps the surface. Stage 2 reveals what is running underneath it — and most people are surprised by what it finds.

Scores tell you where you are. They do not explain why the pattern exists, what is sustaining it, or why the things you have already tried have not worked. That is what Stage 2 — the Insight Stage — is built to do. It goes four levels deeper than any score can reach.

What Stage 2 — Insight — will uncover for this profile:

- 1 What is the specific pattern behind "Career Anxiety" — and what is actually driving it beneath the surface?
- 2 Which internal blocks versus external circumstances are really shaping this career situation?
- 3 What does this profile predict about the next career move — and what needs to change first?

Something specific is sustaining this pattern. Stage 2 will name it.

Most people who complete Stage 2 describe it as the first time the "Career Anxiety" pattern actually made sense — not just as a score, but as a system that can be understood and changed.

Career Builder — MetryxOne Intelligence Services

The following services are progressively unlocked as you advance through the CAPADEX stages. Each one is built around your specific behavioural profile — not generic templates.

Role Alignment Intelligence

Available now — Curiosity Stage

Based on your Curiosity profile, an immediate analysis of how well your current role fits your behavioural strengths — and what the misalignment cost is in daily performance and satisfaction.

Competency Benchmarking

Unlocks at Insight Stage

Compare your specific competencies against verified industry standards for your role, sector, and seniority level. See exactly where you stand — and where the gap is worth closing.

Job Market Prediction

Unlocks at Insight Stage

Predictive analysis of how your current behavioural profile aligns with live market demand. Identify which roles, sectors, and environments are the strongest fit — and which are likely to reproduce the same friction.

Job Studio

Unlocks at Growth Stage

Profile-matched tools for CV positioning, interview preparation, and personal narrative development — all grounded in your actual behavioural strengths and growth edges, not what merely sounds good on paper.

Career Transition Modelling

Unlocks at Mastery Stage

A full simulation of potential career moves using your Mastery-stage behavioural profile as the foundation. Predict which transitions are most aligned, most risky, and most likely to produce lasting satisfaction.
