

PROMOTION_READINESS REPORT

Generated 25 June 2026 · MetryxOne

Executive Summary

Promotion readiness requires at least two measured snapshots over time; Sarah Johnson currently has 0.

Candidate Information

Name: Sarah Johnson

Reference (masked): user_4286d980cc6c

Current role: Senior Product Manager

Target role: Director of Product

Industry: Technology

Experience: 8 years

Education: MBA

Location: Bangalore, India

Profile summary: Senior Product Manager with 8 years across B2B SaaS, leading cross-functional teams and data-driven product strategy. MBA. Seeking director-level product leadership.

Assessment Summary

Status: insufficient_history — trend cannot be computed from a single snapshot.

Visualizations

Insufficient validated data to populate this section yet.

Why: Fewer than two measured EI snapshots exist, so no trajectory can be computed.

How to populate it: Re-assess over time so a second measured snapshot is captured (persistEiProfile).

What is needed: At least two measured snapshots in ei_profile_snapshots.

Expected output once available: A net-delta trend per dimension with a ready/insufficient verdict.

Interpretation

A trajectory needs at least two measured points in time. With one snapshot the platform reports insufficient history rather than inferring a trend.

Recommendations

Insufficient validated data to populate this section yet.

Why: Fewer than two measured EI snapshots exist, so no trajectory can be computed.

How to populate it: Re-assess over time so a second measured snapshot is captured (persistEiProfile).

What is needed: At least two measured snapshots in ei_profile_snapshots.

Expected output once available: A net-delta trend per dimension with a ready/insufficient verdict.

Confidence Level

Confidence not applicable — insufficient history.

Data Source

progression-engine.buildProgression !' ei_profile_snapshots over time (net delta between measured snapshots).

Generated Timestamp

This report was generated on 25 June 2026 at 11:39 UTC.

Report pack version: 1.0.0. It is a point-in-time snapshot; re-running the assessment workflow refreshes the underlying data.
